Summary Report of the Industry Institute Interaction

Enrun India Pvt Limited established in 1996, situated in Hyderabad at Toli chowki, and the managing director of the company is Mr. Mohammed Zubair having their manufacturing company of panels at Balanagar. Here they give training on PLC and SCADA, industrial Automation and Electrical control panel. Established in the year 1996 at Hyderabad, Telangana, “Enrun India” is a “Partnership” based firm, involved as the manufacturer of Control Panel, Electrical Tray, Electrical Pole, Floor Junction Box and Garden Lighting. It is one of the trusted name among the topmost companies in this business, involved in offering a wide assortment of these products. Under the esteemed guidance of “Sadanand (Partner)” it is attained a huge client base in the market.

It is marked to introduce reputed firm Enrun India, CPRI certified manufacturers of Electrical Panel Boards. It has fully fledged manufacturing facility with required machinery and qualified man power to take up various fabrication as per requirement built. These works are carried out strictly as per ‘IS’ standards.

They work on Industrial Automation , Electrical design, Industrial control panels, Auto-cad, Energy Management, through leveraging technology & achieving it by creating a culture of Responsibility with a focus on customer Satisfaction. The company also designs the panels. The major work is carried out on PLC applications and SCADA. They manufacture raw materials like control panel Switches, variable frequency drives for electric drive applications from various companies and Assemble.

The discussion has been carried out with the company team to collaborate with KG Reddy College of Engineering & Technology to undergo research and development activities. It helps both the sides to do research on latest advancements and also provide the same to the students to upgrade their knowledge. They also accepted our request to conduct industry oriented seminars or lectures on the latest technologies. MOU with the industry will help to meet the requirements of the above and bridge the gaps between the industry and the institutes. They can also assist the students of KG Reddy College of Engineering and Technology in the placement activities and the industrial visits.
