Objective:

The primary motto of this project foodpedia is to engage fellow people in preparing dishes and making videos out of it, to explore, expose and posting the same to social media.

Outcome:

Here, many rotaractors participated in the event and posted their videos into the provided social media (instragram). Also a proposal for letterhead exchange from international team of rotaract club of SATYABAMA RID 3232.

Resource Persons:

International team of Rotaract Club of Satyabama District 3232.

Summary Report on “FOODPEDIA”

On 06-01-2022 members from our club participated in the event named foodpedia which was organized by rotaract club of satyabama, district 3232.

In this program we were supposed to shot a video of ourselves preparing delicacies and post them on social media handles such as instagram. Also explaining the benefits and history of the prepared dish within a video span of 2 minutes.

Advantages of Processed Foods

- Foods are usually processed to kill harmful bacteria or other microorganisms, to make them safer and for longer shelf life.
- Some processed foods like peanut butter, blueberry jam, homemade cranberry juice, apple juice, grape juice, are healthy choices that can be harmless.
- Processed Foods are preserved in cans, bottles and jars that are airtight, so the food packed inside is free of bacteria.
- Processed foods are easy to get, as they are available in all seasons and at all stores.
- Processed foods like pre-cut vegetables and meat are quality convenience foods for busy people and for those who can't visit a faraway market to buy vegetables and meat.

Disadvantages of Processed Foods

- Food processing removes some of the nutrients, vitamins and fiber present in the food.
- Processed foods are obtained from laboratories and not nature. The foods are genetically modified and may cause gastrointestinal disorders, infertility and can damage your organs.
- Frequent intake of processed foods can make people become angry and irritable. Consumption of natural whole foods can help level out your mood, sustain energy levels and leave you feeling content and relaxed.
- The trans fats and sugar present in processed items can cause inflammation, an unhealthy condition that leads to asthma.
