Summary Report on Womens day

Venue: KGR CET SEMINAR HALL

Objective : To recognise the social, economic, cultural and political achievements of women also marks a call to action for accelerating gender parity.

Outcome : Women are increasingly being recognized as more vulnerable to climate change impacts than men, as they constitute the majority of the world's poor and are more dependent on the natural resources which climate change threatens the most.

Activity: Womens Day

.

Report :

All the teaching and non-teaching staff & students of **KGR CET** celebrated Womens Day on 8/03/2022 from 10:00 am onwards. All have assembled in the Seminar hall .Dr Padma sai and v.prathyusha spoke about Importance of women Role in the society.

On this day, people across the globe are called to witness the amazing achievements made by women and also participate in different kinds of activities such as rallies, discussions, etc that have the main aim to bring equality in society.,

International Women's Day is not only a commemorative event but also emphasizes on those extraordinary women who paved their path of achievements through the gender-biased society. Every year on this day, women across the globe remember the famous mentors through history who made their way and achieved their desired goals. Women on this day work towards furthering the goal that they had set.

Department of
Student Affairs

On this day, conferences, rallies, debates, and discussions are organised, and women across the globe participate in these events. Some women even narrate their stories and also make their voices heard.

There is no doubt that women are making the world a better place with their infinite strength, willpower, and determination. Every day, with power enough to shatter the shackles of patriarchy, women across the globe are overcoming different hurdles and making their place evident in the society.

, sustainability is a public discourse that impacts the environment and the socio-economic aspect of our society. To build a sustainable future, it is important to focus on supporting and empowering women to overcome gender barriers to progression. For a diverse country like India, it becomes a mammoth task, especially when you have to instill awareness at the grassroots level. In that vein, the hospitality sector is in a strong position to bring that discourse as it reaches the length and breadth of the country."

Advancing gender equality in the context of the climate crisis and disaster risk reduction is one of the greatest global challenges of the 21st century. Women are increasingly being recognized as more vulnerable to climate change impacts than men, as they constitute the majority of the world's poor and are more dependent on the natural resources which climate change threatens the most. At the same time, women and girls are effective and powerful leaders and change-makers for climate adaptation and mitigation... This International Women's Day, let's claim "Gender equality today for a sustainable tomorrow", reads a statement by the United Nations.

International Women's Day is celebrated to recognise the social, economic, cultural and political achievements of women.

Organisations like colleges and institutions across the world celebrate International Women's Day by holding public speeches, rallies, exhibitions, workshops and seminars on themes and concepts, debates, quiz competitions and lectures.
