**STUDENT PARTICIPANT:**

Shashank

**Introuduction**

Sajjan pally is a small village with an approximately 102 households and this village is one of the revenue sources for the Kanakamamidi gram panchayat.

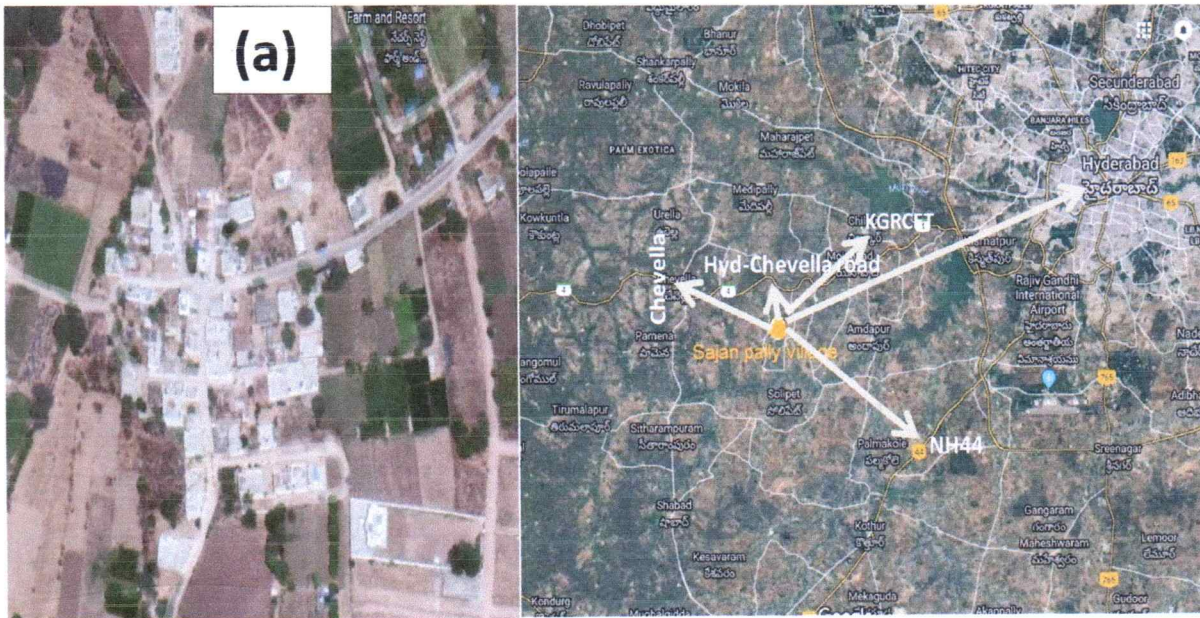

**Location:** The village location is given in the table

Location coordinates: 17.297115° N and 78.218437° E

**FACULTY COORDINATOR:**

Mr.Mahantesh

Location point	Distance between location point and Village
Chevella (District Head Quarters)	13.7 Km
Hyderabad	40 Km
Moinabad (Block)	10 Km
KGR CET	10.7 Km
NH44	30 Km
NH4 (Hyderabad-Chevella main road)	3.2 Km

**Figure 1:** (a) areal view; and (b) Linkages for the sajan pally village (images are taken from google maps)

I went along with a student sajjanpaally village @9:30 am and villagers are welcoming to us very good and After this reconnaissance survey, village level and house hold survey were conducted for collection of basic information and problems of the village. While conducting household survey patch visit were done at different locations of the village. In this village nature has given a lot, but most of the families of this village are landless. They earn their meager livelihood working as unskilled labour. The farmers grow food crop, cash crop, horticulture and paddy crops.

<https://drive.google.com/file/d/1K6UnJ5j2X2JJzXo4X2s83SjY2hN5LIsB/view?>

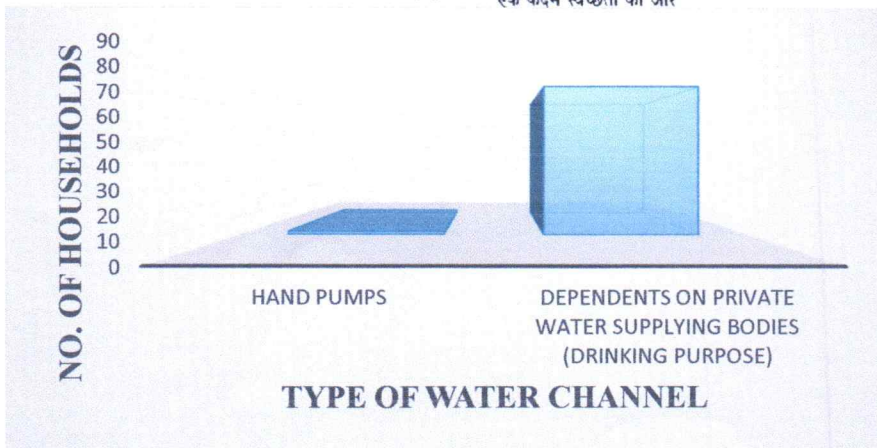

Almost 84% household have toilet constructed, 28.35% of toilets are constructed under Swachh Bharat Mission all are well finished and most of the toilets are built by villagers by their own money. In this village many families have received LPG Gas under Ujjawala Yojna and very few families use wood for domestic fuel.

<https://drive.google.com/file/d/1JpOCf-SV-aRRuJpI3yAU19IUft-qud7G/view>

**Drinking water facility:** For the requirement of daily water needs, entire village depends on their personal handpump as more than 90% households in the village have their own handpumps. Water table is just 20'-30'feet shallow. A water storage (reinforced concrete) RCC tank with a capacity of more than 75000 liters and bore depth of 400-500 feet has been constructed in year ~2010-2011 but not in operation since that date. The cause of delay in operation is still not clear among the villagers.

Availability of drinking water	Village data
Hand pumps	2
Dependents on private water supplying bodies (drinking purpose)	82
Government water pumps	0
Water frequency through Govt. supply	Once in week

**Figure 4:** Utilization of different types of water bodies among the village households

UGC AUTONOMOUS

**Conclusion:** We have adopted various methods to keep our campus clean and green such as vermicomposting, tree plantations, bottle garden etc. Nowadays sustainable development concepts is applicable on the principles of 5R i.e. Rethink, Refuse, Reduce, Reuse & Recycle to reduce waste. We have established one composting unit in our college campus. We have adopted a sagganpalley village and carrying out various activities to contribute towards society and took part in the mission clean and green India. Our college has Eco club that organize various activities like tree plantation time to time, maintain nursery, give awareness on sanitation and hygiene etc. Continuously survey and to explore the campus by Eco club to identify where do we need more attention and amendments to maintain as Swachh and green campus. We will reduce of energy consumption through management processes like keep our campus clean and green by planting more and more trees, separating waste (biodegradable and non-biodegradable), ban plastics use in campus, use LED bulbs. In such difficult time of Pandemic we are doing work towards sanitization, hygiene and waste management with the help of students and college staffs. Our students doing various activities regarding national and international days to celebrate and create awareness among community by organizing many competitions like poster and collage making, slogan writing, video message, quiz competition etc. There is need to question ourselves, that what we have given to our country, rather than what country has given to us. Swachhta is a beautiful initiative which makes betterment and upliftment of the society, where it makes everyone of us to think and realize the roles and responsibilities towards country, thus the college start many activities and awareness programmes to make their contribution towards Swachhta Abhiyan. We will wear masks, maintain social distancing and use sanitizer, promote health, build resilience in our life by giving mental, physical, social and psychological support. Generating mass awareness on cleanliness and hygiene amongst students and staff members by holding regular sensitization programme on “Swachhta Action Plan” so as to motivate them to contribute to this campaign. Our college made the whole campus sanitizes time to time to avoid the contamination during this Pandemic period. In the wake of this pandemic our college is in resolution to take all necessary steps at the individual and college level to create a strong chain of social bond to make ourselves always available for the people in need.
