Impact of Internship

The Under Graduate (UG) students of engineering stream were encouraged to take part in Industry Interns, which makes concrete impact on student's personal, interpersonal, academic, occupational and civic characteristics.

Especially for Computer Science and Engineering, UG students, it helps to enhance quality of higher education and to improve skills & competencies among students. It helps to fill the gap between the theoretical learning at class room and practical application at work place. Internships also help them to achieve higher professional competencies and excellence in their field of interest and so that they can perform better in their future job with full potential knowledge.

The internships also helps to achieve program Outcomes viz. Problem Analysis, Design/Development of Solutions and to learn Modern Tools usage as per Outcome Based Education (OBE). And Students are placed 50% who did their Internships accordingly.
