1. What is the percentage of students completing the internship—83.2%
2. Is that industry related to core domain of department—83
3. What is the duration of the Internship—2weeks
4. Can we see the certificates (or) reports--yes
5. How many students completed the internships--140
6. How many students are converted the internships to academic mini and major projects---5
7. How many students are motivated to work on technologies on which internships completed---12

- **83.2% of students** successfully completed internships, indicating strong institutional support and student engagement.
- **83% of internships were in core domain areas** (e.g., VLSI, Embedded Systems, Communication Systems), ensuring academic and industrial relevance.
- Students reported that the **2-week internship duration provided initial industry exposure** but expressed interest in longer durations (4–6 weeks) for deeper learning.
- **140 students completed internships**, showing widespread participation across the batch.
- **5 students converted their internship work into mini or major academic projects**, demonstrating the integration of industry experience with curriculum.
- **students were inspired to explore technologies further**, including learning new tools and enrolling in MOOCs post-internship.
- Students appreciated **faculty mentoring and lab support** during the internship period and while applying acquired knowledge in academic tasks.
- Students felt more confident in technical interviews and job readiness due to internship exposure.
- 17 students reported **placements in core domain companies**, attributing success to skills gained during internships.

Impact Analysis on Student Internship

A.Y: 2024-25

Department of ECE encourages students who are advanced learners also all other interning students to go for internship in various domains both technical and non-technical to improvise their skills suitable to different roles towards their career. As per the feedback received in previous academic year, students were expecting more duration to work on internship also core domains for internship. So, department supported them by allowing to go for an internship of maximum 6 months, and suggested and supported in all the way to get internship opportunities in core domains like VLSI, IoT, Embedded and Communication systems etc., with well-known organisation like OMNYTRIX, ABTECH, CISCO, BOLT, N.K. SWITCHGEARS, VOICE, IBM Skills Build, Ananth Technologies, IIIT Hyderabad, etc.

At the end of the internship, feedback has been collected from the students, on various points and the feedback given is listed:

State two important experiences that had been gained from the internship:

- More knowledge on practical experience, doing projects by analysing the related things
- Learned New Technology Skills and Real time projects
- Coding, group discussions
- Research experience and work experience
- I have learned about controllers, sensors, and coding
- Gain knowledge in IoT Side and learned how to deal with components
- Gained more knowledge on IOT and Raspberry pi
- New technologies and stages of product development
- Mentoring and work experience
- To explore ideas through IoT and gaining confident
- Got to know python libraries and machine learning algorithms
- Knowledge, Real time experience
- New and improved skills
- Skills and abilities
- Gain knowledge in Marketing Side
- How to present and gained knowledge about sensors
- Confidence
- As it is my first internship it is a one kind of practice for my future internships
- We have learned about programming in Microsoft

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

- Explored how the industry works, and things are done in large scale.
- Projects and experience
- Working with scientists. Understanding high level conceptual learning
- Python coding applications
- Adaptability to work environment and hypothesizing new solutions
- Data science and machine learning
- Skills and time management

State things you would want to see improved in future internship:

- Need to gain knowledge by doing more practical things
- Giving tasks as per intern's capabilities
- Developing and implementing a real time project
- Should have a prior knowledge about the project/ training before entering into an organization.
- Offline and paid internship
